Overall Length:

10.700 inches

Overall Height:

6.200 inches

Overall Width:

6.700 inches

Voltage In Volts And Current Type:

110.0 ac

Product Name:

Urinalysis analyzer point-of-care portable clinitex status

Special Features:

Used for in-vitro, semi-quantitative detection of urine analytes to include: albumin, bilirubin, occult blood, creatinine, glucose, ketone, leukocytes, nitrite, ph, protein, specific gravity and urobilinogen; can also detect urinary hcg with clinitest hcg cassettes; measures one test strip at a time; instrument memory capacity: 200 patient test results, including operator identification; stable at temps of 41 degrees - 104 degrees f, 20-80% relative humidity, non-condensing, self-calibrating

Shelf Life:

N/a

Unit Of Measure:

--
