Design Type:

Closed

Thermometer Quantity:

1

Test Unit Quantity:

1

Special Features:

Equipped with 1/4 vga display and alphanumeric keypad; temperature visibility in excess of 5 meters; also displays method; expected flash point; results; operator name; calibration menus, diagnostic menus, this is an automated pensky martens flash point tester capable of twenty different methods, comes standard with pt100 temp probe; range is 38 to 700 degrees f, 4 heating rates, polymethacrylat shield, ignition is gas or electric (115v), thermal detection, forced air cooling, automatic barometric pressure correction, auto calibration, multi-level password protection, 550 test memory; 20 sample specification memory; 20 operator name memory, 20 method memory, rs232c interface; printer output, fire protection with thermal fuse and external alarm connection; automatic end of test gas source suppression, flame extinction detect with auto light or re-light, maximum gas pressure of 40 millibar

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
