Overall Length:

17.500 inches

Overall Height:

22.500 inches

Overall Width:

16.500 inches

Product Name:

Ics-3000 dc detector/chromatography compartment dual

Special Features:

High performance dual zone thermal control provides two independent temperatures innovative electrochemical detection technology; cd conductivity detector features advanced electronics for superior detection; dual conductivity and electrochemical detection provides increased flexibility and utility; optional am automation manager with flexible valving configurations for eluent

General Description:

Addition and sample handling; supports autoprep, preconcentration, autoneutralization, matrix elimination, and postcolumn reagent addition

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
