Overall Length:

9.000 inches

Overall Height:

3.000 inches

Overall Width:

4.200 inches

Voltage In Volts And Current Type:

120.0 ac

Product Name:

Turbidimeter portable

Special Features:

Measurement method: ratio turbidimetric determination using a primary nephelometric light scatter signal (90 deg) to the transmitted light scatter signal; range: 0-1000 ntu; detector: silicon photodiode; sample required: 15 ml; sample cells: round cells 60 x 25 mm (2.36 x 1 in) borosilicate glass with screw caps

Functional Description:

Measures water clarity and detects particulate matter that may adversely affect water purity/quality

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
