Overall Height:

9.200 inches

Product Name:

Monitor heat stress with carrying case

Special Features:

Monitors key environmental factors for heat stress using wet bulb globe temperature measurements; displays to 0.1 degree; operating temperature range: sensor assembly 23 to 212 degrees f, electronics 23 to 140 degrees f; accuracy: +/- 0.9 degrees f between 32 and 212 degrees f; includes: 9v alkaline battery, replacement wicks, water bottle, verification module, and storage case

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
