Body Diameter:

12.0 millimeters

Body Length:

200.0 millimeters

Body Material:

Plastic epoxy clear

Product Name:

Electrode ph standard gel filled intellical

Ph Measurement Range:

+0.0 to 14.0

Reference Junction Type:

Double junction

Special Features:

Digital combination ph probe with non-refillable, gel filled double junction reference and built-in temperature sensor; provides fast, stable response in water quality applications; cable length: 1 m; ph range: 0-14; sensor type: glass; temperature range: continuous use 0-80 degrees c; junction: ceramic pin

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A506n0
