**Body Diameter:**

12.0 millimeters

**Body Length:**

200.0 millimeters

**Body Material:**

Plastic epoxy clear

**Product Name:**

Electrode ph standard gel filled intellical

**Ph Measurement Range:**

+0.0 to 14.0

**Reference Junction Type:**

Double junction

**Special Features:**

Digital combination ph probe with non-refillable, gel filled double junction reference and built-in temperature sensor; provides fast, stable response in water quality applications; cable length: 1 m; ph range: 0-14; sensor type: glass; temperature range: continuous use 0-80 degrees c; junction: ceramic pin

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

A506n0
