Product Name:

Methane/non-methane analyzer for ambient and process applications

Method Of Analysis:

Chromatographic and flame photometric

Special Features:

Microprocessor-based, oven heated methane/non-methane gas analyzer for high accuracy, sensitivity, and stability. Designed to measure varieties of hydrocarbon concentrations from a sampling point. Applications: process monitoring, efficiency monitoring, and ambient monitoring.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A503u0
