**Mounting Type:**

Floor

**Drive Type:**

Single head

**Maximum Generator Diameter Accommodated:**

18.000 inches

**Driving Motor Transmission:**

Not included

**Electric Motor Blower:**

Not included

**Special Features:**

8000 psi test capacity; air operated test pump; soft seated inlet/outlet check valves; 8 and one-half in. Dia. Calibrated test gage; 8000 psi calibrated test cylinder; 18 in. Dia. By 72in. Tall water jacket; 6 individually valved manifolded burettes, sizes: 0-12.5 cc, 0-25 cc, 0-50 cc, 0-125 cc, 0-250 cc, 0-360 cc; 18 in. Time vs pressure chart recorder; cylinder to be tested is enclosed in water filled jacket, pressurized internally to specified test pressure volumetric expansion measured via water displaced into calibrated burette: pct permanent and elastic expansions calculated from measured total and permanent volumetric expansion

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fig:**

T361-f
