Functional Classification:

Aa-8.14

Functional Description:

Creates vibrations of known char for breakdown testing of any apparatus subject to vibration failure

Entry Date:

70-04-01

Reference Data And Literature:

Waugh equip.Co cml data

Relationship To Similar Equipment:

Functionally similar to all vibration testers; differs in minor design char

General Description:

36.000 in.Lg, 22.000 in.W, 16.000 in.H; table mtd; horiz motion; 18.0 by 18.5 in.Table; 0 to 0.0625 in.Vibration amplitude range; 150 lb, 12 g load limit; 600 to 3600 cycles per min automatic table freq, var freq control; put power by 3 hp elec mtr 220 vac, 60, three phrase; nonmobile

Type/model Designation:

Vmj-2-hb

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900
