Functional Classification:

Aa-8.9

Functional Description:

Designed for single plane balancing of disc shaped bodies. The amount of unbalance is displayed in ounces or grams along with angular location, on a meter, in the electrical cabinet. Rotors of different dimensions can be balanced very accurately utilizing a simplified procedure to compensate for rotor mounting differences

Entry Date:

80-10-15

Reference Data And Literature:

Commercial manual, no af t.O.

General Description:

Consists of balancing machine, electronic cabinet, motor control cabinet, load 250.0 lbs, mamimum diaof rotor 60.0 in.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
