Precision measurement equipment laboratories

Special Features:

Manufacturers suggested name reference standard, fiber optics; two kilometer fiber

Functional Description:

Calibration/maintenance of optical test equipment and cable systems

General Description:

Standard reference fibers will be used as transfer standards to provide certification of distance measuring accuracy in single mode optical time domain reflectometers (otdr); reference fibers are packaged in metal enclosure 12 x 8 x 2 in.; biconic input/output connectors; specially designed for use in conjuction with otdr
