End Application:

Precision measurement equipment laboratories

Special Features:

Manufacturers suggested name reference standard, fiber optics; four kilometer fiber

Functional Description:

Calibration/maintenance of optical test equipment and cable systems

General Description:

Standard reference fibers will be used as transfer standards to provide certification of distance measuring accuracy in single mode optical time domain reflectometers (otdr); reference fibers are packaged in metal enclosure 12 x 8 x in. With biconic input/output connectors; specially designed for use in conjunction with otdr

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
