Special Features:

Designed with as&e patent flying spot scanning beam technology. Backscatter at low; power for feet x-ray detection on one monitor & high power for conveyer inspection of baggage on second monitor. Automatic threat detection allows detection of explosives, weapons, or nuclear materials. Video reverse converts the white portions of the transmission image to dark. Image storage on vcr interface. Zoom allows efficient simultaneous zooming of backscatter z image and the transmission image. Dimensions length 136.0 in. Width 67.0 in, high 50.0 in. Power requirements 120/240 vac 3.5 kva single phase

Functional Description:

Used to screen passenger baggage at various military passenger terminals

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli

Fig:

A23800
