Carrying Case:

Provided

Usage Design:

External and internal

Indicator Type:

Digital counter

Installation Design:

Portable

Test Type:

Distortion

Indicator Reading Type:

Multiple

Indicator Design:

Direct reading

Special Features:

Freq 100 hz-3 mhz; display: impedance plane, time base sweep, 8 x 4 in.Lcd screen overlay; built-in digital screen printer; rs-232 i/o; audio-visual alarm; program storage: 50 test programs, instant recall; phone link for transfer screens and programs via modem; rugged splash-proof packaging; save screen function; auto null, rotate function; wide probe selection: absolute, differential, reflection

Functional Description:

Used to detect cracks, defects in conductive mats; conductivity measurements: alloy separation, heat damage; material thickness measurements: corrosion incl; coating measurements

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T264-b
