Overall Length:

7.000 inches

Overall Height:

0.875 inches

Overall Width:

4.000 inches

Product Name:

Eddy current reference standard

Special Features:

Dconsists of a composite plate with 20 holes from 5/32" to 3/4" in 1/32 increments. 9 notches and a radius. Holes, notches and radius area all have known defects. Material is titanium alloy 6al-4v.

Functional Description:

Used to calibrate and verify proper operation of eddy current probes and instrumentation used in nondestructive testing of titanium

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A23900
