Overall Length:

40.900 inches

Overall Height:

42.000 inches

Overall Width:

24.000 inches

Voltage In Volts And Current Type:

115.0 ac

Special Features:

Includes turbo pump option, 120 vac option, universal cart mounting option, and roughing/backing pump 450 l/m (17 cfm) option; includes recorder jack 0-5 vdc, audio alarm, 50 segment bar graph indicator, test port and automatic protecting, temp stabilized solid state sensing tube; microprocessor controlled pushbutton operation; disposable dual filament ion source; auto protection in case of power loss or inrush of air

Functional Description:

Used for general chamber testing, small parts testing, sniffing of helium charged parts, semiconductor and optical processing system testing

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
