Overall Length:

0.540 inches

Overall Width:

0.350 inches

Special Features:

Item is dual element transducer; frequency: 5.0 mhz; temperature withstand capability is 800 degrees f; recommended duty cycle for surface temperatures from 200 degrees f to 800 degrees f is 10 seconds contact followed by of one minute air cooling; element size is 0.25 inches; high-strength flexible 6 ft. Right angle potted cable terminating in bnc connectors

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A50110
