Tip Replaceability Feature:

Not included

Special Features:

Permits measurement of currents from 100ma to 100a rms, dc to 100 khz without breaking into the circuit

Functional Description:

Used to analyze and measure distorted current wave forms and harmonics

Type/model Designation:

1146a

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T228-h
