Overall Length:

25.000 inches

Overall Height:

10.250 inches

Overall Width:

19.000 inches

End Application:

Tf39 fan stage disk

Functional Description:

Used to detect cracking, on-wing with an ultrasonic transduce (probe) placed on the forward side of the aft flange of the tf39 fan stage 2 disk

Reference Data And Literature:

Serd no. 1552

General Description:

Consists of the following: 2 transducer (probe) ass'ys r/n 389-042-212; 2 cable ass'ys nsn 6635-01-172-9280; 1 reference standard r/n ut-1353-xx-xxx; 1 video probe guide tube r/n 9439m59g02; remote cleaning tool r/n j052203; 1 bottle 500ml nsn 6640-01-466-2771, filled with 4 parts glycerin & 1 part water by volume, used as ut couplant; 1 temporary marker r/n q-404; 1 storage container r/n 202868cw01

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
