Overall Diameter:

Between 0.250 inches and 0.281 inches

End Application:

Spitfire, minimite, hocking and rohmman scanners; f/a 22 raptor

Conductor Attachment Method:

4 pin fischer connector

Special Features:

Plastic tip, ss back shell, 2 inch working length. Uses reflection differential type coil operating in 500 khz to 3 mhz. Suitable for aluminum structure and low conductivity materials

Functional Description:

Designed to allow the use of the same probe when holes reamed larger diameter. Also check unusual hole size when a fixed size probe is unavailable

Relationship To Similar Equipment:

Similar to spo-5000 but expanded to larger diameter

Type/model Designation:

Spo-5965

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T228-h
