Special Features:

Built-in peltier thermostate for temperature control; memory cards for method transfer or data storage; barcode reader connection to easy read in sample id and operator names; connection to computer for data handling; printout with all important data like operator name, date, time, serial number of instrument and measurement data; measurement range 0...3 g/cm³; accuracy 0.0001 g/cm³

Functional Description:

4 place digital density meter for measurement of density, specific gravity or concentration of aqueous solutions

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23900
