End Application:

F/a-18 support equipment

Component Quantity:

9

Product Name:

Serd item name = reference standard set-repair verification

Special Features:

Consists of 9 reference standard patches of various structural components aluminum, honeycomb, housed in a plastic case 23.0 by 16.0 by 8.70 inches

Functional Description:

Used to determine the extent of damage before repairs as well as to evaluate the repairs; used with p/n pd238 transducer set, p/n usn 52 flaw detector, and p/n 1877as100-1 bond joint tester

Reference Data And Literature:

Serd 6549

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A23800
