End Application:

Ground support equipment

Product Name:

Propellant tester

Special Features:

Used to test physical properties of propellant and various explosives. Tests include axial, tension and compression of propellants under a range of extreme temps.; includes console assembly, temp. Controller load cells, hydraulic actuators, servo valves, load units, load frame, pressure vessel assembly, high pressure hydraulic sys., high pressure nitrogen sys, sensors, oscilloscope, test software, temp and pressure readouts, and computer; used to perform sop maktp-sop09j-521

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T01200
