End Application:

South korean government

Product Name:

Road surface profilometer

Special Features:

Unique "stop and g" feature permits international roughness index (iri)and ride number (rn) data to be collected in urban areas; laser sensors are adjustable to any width between 1.5 to2.0 mm (60.0 to 79.0 inches) to provide advanced automated high quality pavement roughness measurements for engineers and construction managers

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
