Overall Length:

14.000 inches

Overall Height:

1.000 inches

Overall Width:

2.000 inches

End Application:

C-17 aircraft

Product Name:

Reference standard

Special Features:

Material stitched carbon epoxy; painted gray; operating temp -40deg f to 125deg f; weight 1lbs

Functional Description:

Used in between the sensors and the targets during fault isolation or functional testing of different systems. The tools alter the magnetic field of proximity sensor so desired target-near or target-far can be obtained without putting the aircraft in airmode

Reference Data And Literature:

Serd 110659

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A23900
