Overall Length:

25.000 inches

Overall Height:

9.000 inches

Overall Width:

20.000 inches

End Application:

F101-ge-102 aircraft engine

Unpackaged Unit Weight:

20.000 pounds

Product Name:

On-wing ultrasonic inspection set for the fan stg 1 disk dovetail post corner 1

Special Features:

Consists of: ultrasonic probes 389-070-331 2ea and 389-074-361 2ea, reference standard ut-2082 1ea, ultrasonic cable c-033 2ea, velcro straps 94905k13 32x1in 1ea, guide tube 1300 1ea, pitot cover f10-006 1ea, glycerin g33-500 500ml bottle 1ea, storage container im2700

Functional Description:

Used to inspect the corner 1 disk dovetail post of stage 1 fan disk while installed within assembled engine

Reference Data And Literature:

Serd 5130

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
