Measurement Unit:

Ounce

Operation Method:

Manual

Unit Type:

Mechanical

Load Receiver Type:

Chisel head and cone head and flat head and hook and notched head and push rod

Mounting Method:

Table

Scale Range:

0 to 200 lbs

Scale Smallest Increment Graduation:

2.0 lbs

Spring Type For Which Designed:

Compression and tension

Torque Indicating Wrench Usage Feature:

Not included

Spring Travel Gage:

Not included

Product Name:

Tester, spring resiliency

Functional Classification:

Aa-5.1

Special Features:

Handles included, 4 to 7 inch rod accessory, 5/16-18 threads

Functional Description:

Manually operated push/pull force gauge

Entry Date:

12-03-27

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T398-h
