Current Type:

Ac and dc

Product Name:

Debris tester mk 3

Voltage In Volts:

100.0 and 250.0 and 12.0 and 28.0

Phase:

Single

Special Features:

Measures quantity of magnetic debris deposited in oil filters or on magnetic chip detectors removed from engine and gearbox oil systems; results are displayed on lcd screen and may be stored in system memory

Frequency In Hertz:

55.0

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T264-a
