Product Name:

Wind tunnel

Special Features:

Can airspeed in excess of 50 mph in the 12 inch test section is maintained by a 1/2 horsepower fan; a honeycomb with circular elements and a carefully designed entrance cone provides a flow in the test section which is steady in both magnitude and direction with a uniform transverse velocity profile; fluctuation in airspeed at any desired setting in less than 0.2 mph even when the airspeed control is left unattended; a small angle diffuser contributes to flow stability

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T269-e
