**Product Name:**

Wind tunnel

**Special Features:**

Qan airspeed in excess of 50 mph in the 12 inch test section is maintained by a 1/2 horsepower fan; a honeycomb with circular elements and a carefully designed entrance cone provides a flow in the test section which is steady in both magnitude and direction with a uniform transverse velocity profile; fluctuation in airspeed at any desired setting in less than 0.2 mph even when the airspeed control is left unattended; a small angle diffuser contributes to flow stability

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T269-e
