Mounting Type:

Leg

Carrying Case:

Not provided

Assembly Form:

Assembled

Accessory Components And Quantity:

Condenser 1 concentrator 1 vaporator 1 regulator, water level 1, wrench, hexagonal 1

Feed Type:

Continuous

Water For Which Designed:

Hard water

Condenser Type:

Overhead tube

Heating Method:

Steam

Pressure Rating:

Between 40.0 pounds and 60.0 pounds

Load Capacity:

5.000 gallons per hour

Distilling Unit Quantity:

1

Boiler Chamberdiameter:

9.875 inches

Boiler Chamberheight:

20.000 inches

Low Water Automatic Heater Shut-off:

Not included

Bleeder Device:

Included

Product Name:

Distilling apparatus laboratory water steam heated 5gal/hr

Special Features:

For operation on steamline

Material:

Copper and steel, corrosion resisting and bronze and nickel copper alloy and virgin tin

Material:

Copper and stainless steel and copper alloy and nickel alloy and virgin tin

Specification Or Standard:

2 class and 5 size

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T269-e
