Product Name:

Ventilation smoke tube kit

General Description:

C/o hand-held rubber aspirator bulb, six tube caps and two glass smoke-producing tubes contained in a plastic carrying case; used where controlled generation of visible smoke is desired in order to determine velocity, direction and flow patterns of slow-moving currents in shafts, mines and tunnels; also used in commercial buildings and industrial plants to determine velocity, direction and flow patterns in heating, ventilating and air conditioning systems

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
