

View Online at <https://aerobasegroup.com/nsn/6640-01-234-4017>

Special Features:

Leak detector, response time: direct flow less than 2 seconds reverse flow less than 2.5 seconds, leak range 10x10 to 3x10 (to minus 11) standard cc/sec, test modes gross to 100 torr, fine test to 7.5 tors, traceable masses helium 3.4, flow modes direct, reverse and combination flows, pressure units millitors, millibars and pascals at leak rates standard cc/sec millibars per sec, pascals (3) per seconds, high vacuum pump, roughing pump, foreline pump, two pirani gauges line pressures, temperature compensated, helium leak standard traceable to nist, dual 90 deg. Mass spectrometer with built-in hivac gauge, self diagnostics system, rs-232 port, includes 9 in color monitor, control panel with key switch power requirements 115 vac/60hz or 230vac/50hz

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T396-f
