Product Name:

Analyzer-counter blood cell 115/230volts 50/60hz ac

Exterior Container Weight:

110.00 pounds

Unit Of Issue Cube:

2.80 cubic feet

General Description:

Automatic, 8-parameter; 115/230 volts, 50/60 hz ac; determines, white blood, red blood counts, hemoglobin, hematocrit, mean corpuscular volume, mean corpuscular hemoglobin, mean corpuscular hemoglobin concentration, platelet count; shall have a 100 ul whole blood sample; temperature range of 15 to 30 degrees cel w/r.H. From 10 to 90 percent; dual probe assembly; digital display; contains a printer and data interface port; requisitioner shall specify if analyzer shall include the capability of 3 port differential; voltage and frequency; cenprome service controlled; requisition using published customer order list only in accordance w/service/agency instructions; service poc-for info, army med av 343-7403 com 301-663-7403; air force av 343-7487, com 301-663-7487, navy av-343-7117 com 301-663-7117

Departure From Cited Document:

Requestor shall specify voltage/frequency required 115 v, 60 hz; 115 v, 50 hz; 230 v, 50 hz; 230 v, 60 hz; request also if it shall have the capability to perform 3-part differential, lymphocytes, mononuclear cells and granulocytes, both in percent and absolute numbers;
