Unit Package Quantity:

50

Accessory Components And Quantity:

Each set c/o 2, palladium catalyst containers; 1, anaerobic generator; 1, bio-bag type a; and 1, bio-bag type a multiplates, 1, anaerobic indicator

Features Provided:

Disposable and immediate consumption unit type

Hydrogen Generation Method:

Palladium catalyst

Product Name:

Generator gas envelope immediate consumption disposable 50s

Special Features:

Transport and isolation system designed to maintain and generate an anaerobic atmosphere up to 96 hours; used with either three petri dishes, miniter plates or two ap1 id strips

Unit Package Type:

Package

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T396-g
