Product Name:

Tube blood collecting polypropylene plas red cap 600 mcl 50s

Special Features:

Serum separator: polyester gel; amber-colored to protect light sensitive analytes; total capacity: 700.0 microliters; sample capacity: 600.0 microliters; polyester gel volume: 100.0 microliters; rim mount; withstands 15,000 x g during centrifugation; designed for collection and separation of capillary blood samples; included with tubes and caps are 20 flo top collectors

Material:

Plastic, polypropylene

Material:

Plastic polypropylene

Supplementary Features:

Manufactured by becton dickinson vacutainer systems

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A24200
