Capacity Rating:

20.000 microliters

Calibration Function:

To contain

Primary Container Type:

Package

Primary Container Unit Quantity:

1

Special Features:

Singl (fixed) volume; plunger wire with polytetrafluoroethylene tip; glass capillaries; hand-held; soft pressure return spring reduces operator fatigue; positive displacement provides aaccurate and reproducible results; letter code: c, styrofoam pack aging complete with glass capillaries, calibration gauge, repair tool and instruction book; unit qty: 1 ea

Color:

Amber

Material:

Plastic and aluminum

Material:

Plastic and aluminum

Style Designator:

Capillary tip

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A24200
