20.000 microliters Calibration Function:	
Calibration Function:	
To contain	
Primary Container Type:	
Package	
Primary Container Unit Quantity:	
1	
Special Features:	
Singl (fixed) volume; plunger wire with polytetrafluoroethylene tip; glass capillaries; hand-held; soft pressure retu operator fatigue; positive displacement provides aaccurate and reproducible results; letter code: c, styrofoam pack	
glass capillaries, calibration gauge, repair tool and instruction book; unit qty: 1 ea	
Color:	
Amber	
Material:	
Plastic and aluminum	
Material:	
Plastic and aluminum	
Style Designator:	
Capillary tip	
Shelf Life:	
N/a	
Unit Of Measure:	
Demilitarization:	
No	
Fiig:	
A24200
