Product Name:

Plate reader automatic mrx ii spectral range

Special Features:

Mrx ii; spectral range: 340nm - 850nm; dynamic range: -0.100 - 4.000 od; single, dual and multiple wavelength reading modes; on-board self-diagnostics; includes 4 filters: 405, 450, 490 and 630nm; compact modular design with on-board storage for up to 100 test protocols, 100 plates of data and 20 stored curve-fits with standard endpoint software; up to 12 assays can be performed on one microplate; provides flexibility; by combining the instrument wide spectral range with optional temperature control to 63 degrees c, the mrx ii becomes an ideal analytical tool for demanding kinetic assays and analysis

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
