Wattage Rating:

75.000 watts

Voltage In Volts And Current Type:

264.0 ac-peak

Product Name:

Analyzer liquid scintillation 264v ac 75watts bench space 9sq ft

Special Features:

Rapid, quantitative testing system for antibiotics, aflatoxins, pesticides, atp hygiene, pasteurization and more; capacity to do 6-12 samples at a time for one or more families; automated print out of date, control point, assay type, sample id, result; programmable display with multiple program functions; liquid scintillation counters.

Supplementary Features:

Uses c2 soft software to directly link an ibm pc with the charm ii analyzer for simp date and analysis

General Description:

Bench space is 9 square feet; system weight is 150 pounds

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
