Product Name:

Analyzer chemical fast response time f/35 different chemicals

Special Features:

Fast response time for 35 different chemicals and a training chip; requires no warm up, results in as little as 20 seconds; increases safety of using cms system; twa and action levels are typically analyzed within 1-2 minutes; immediately ready for another test after providing first measurement; accurate +/-4 to 7% of measured value is achieved for most gases

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

Yes - demil/mli
