Product Name:

Chip chemical ammonia provides best results possible

Special Features:

Provides best results possible; capillaries of several chips have multiple levels to help eliminate cross sensitivity or derive a specific measurement of the targeted chemical; chip consists of 10 measurement capillaries filled with substance specific reagent systems; gas type, part number and batch number are printed on chip and barcode read by the analyzer optics contains information about gas type, measuring range and measuring time required for completing the measurement; each chip is calibrated during manufacturing and is valid for 2 years; ammonia, range 2.0-50.0 ppm

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
