Product Name:

Analyzer hematology w/5 part diff act diff 5

Special Features:

5art differential system; 2 dimensional methodology; employs absorbancy cytochemistry and volume technology. Monocyte, neutrophil and eosinophil populations are identified using abosrbance patterns produced by differential cytochemical staining of granules versus volume; lymphocytes remain unstained, basophil population is analyzed on separate channel using volume gating and selective lysis; single button to change between cbc or cbc w/differential; barcode reader, multiple language software, 60 samples per hr; compact design with cap piercing

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
