Product Name:

Segment processor seg-safe (250 per package)

Special Features:

Seg-safe segment processor eliminates the need to use scissors or slitters when sampling blood bank segments; safely punctures segments with minimal hemolysis, eliminates the need to dilute blood in a separate test tube because it incorporates its own container; eliminates the need for a transfer pipette because its spout produces calibrated drops for typing and cross matching; order (2) packages

Shelf Life:

N/a

Unit Of Measure:

--
