Overall Height:

45.000 inches

Overall Width:

19.000 inches

Overall Diameter:

29.000 inches

Current Rating:

20.000 amperes

Wattage Rating:

2700.000 watts

Voltage In Volts And Current Type:

220.0 ac

Product Name:

Thawing system frozen red blood cells and plasma mt-210 model

Special Features:

Thawer capaci type 10 bags, bath volume 29 gallons, pumping capaci type 20 gal/minute, 50/60 hz, weight 150 pounds, temperature range 34 degrees c to 37 degrees c; eliminates the need for overwrap and provides containment for biohazard leakage from broken plasma bags; its sealed water system is protected from airborne contamination and evaporation; the water is protected with a proprietary additive which is very effective as an algaecide, bactericide and germicide; self-diagnostics program automatically run on startup, anomalies are immediately reported; (fda approved for use with red cells frozen using a closed system)

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
