Overall Height:
45.000 inches
Overall Width:
19.000 inches
Overall Diameter:
29.000 inches
Current Rating:
20.000 amperes
Wattage Rating:
2700.000 watts
Voltage In Volts And Current Type:
220.0 ac
Product Name:
Thawing system frozen red blood cells and plasma mt-210 model
Special Features:
Thawer capaci type 10 bags, bath volume 29 gallons, pumping capaci type 20 gal/minute, 50/60 hz, weight 150 pounds, temperature
range 34 degrees c to 37 degrees c; eliminates the need for overwrap and provides containment for biohazard leakage from broken plasma
bags; its sealed water system is protected from airborne contamination and evaportation; the water is protected with a proprietary additive
which is very effective as an algaecide, bactericide and germicide; self-diagnostics program automatically run on startup, anomalies are
immediately reported; (fda approved for use with red cells frozen using a closed system)
Shelf Life:
N/a
Unit Of Measure:
Demilitarization:
No
