**Overall Height:**

15.000 inches

**Overall Width:**

21.000 inches

**Overall Diameter:**

23.000 inches

**Current Rating:**

15.000 amperes

**Wattage Rating:**

1300.000 watts

**Voltage In Volts And Current Type:**

220.0 ac

**Product Name:**

Thawing system frozen red blood cells and plasma mt-204 model

**Special Features:**

Thawer capaci type 4 bags, bath volume 8 gallons, pumping capaci type 9 gal/minute, 50/60 hz, weight 75 pounds, temperature range 34 degrees c to 37 degrees c; eliminates the need for overwrap and provides containment for biohazard leakage from broken plasma bags; its sealed water system is protected from airborne contamination and evaporation; the water is protected with a proprietary additive which is very effective as an algaecide, bactericide and germicide; self-diagnostics program automatically run on startup, anomalies are immediately reported; (fda approved for use with red cells frozen using a closed system)

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No
