Overall Height:

11.600 inches

Overall Width:

15.800 inches

Overall Diameter:

18.500 inches

Unit Type:

Rotary

Product Name:

Microtome rotary retraction

Special Features:

Ensures secure, precise positioning of specimen block by universal cassette clamp and orienting clamp, enables fast, precise sectioning through adjustable trimming lever, which advances specimen 10 or 50 microns, allows adjustable visual display of micron thickness for accuracy, includes universal blade holder base with lateral displacement feature, allows operators to use the full length of the microtome blade without releasing the blade clamp mechanism or direct blade manipulation, protected against sectioning debris by sliding cover, reduces hand stress via smooth-running hand wheel

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T269-g
