End Application:

Nsn 6640013990483, tactical petroleum laboratory

Paper Type:

Quantitative

Acid Wash Feature:

Double

Precipitate For Which Designed:

Fine

Primary Container Type:

Box

Primary Container Unit Quantity:

100

Product Name:

Quantitative grade circles fine porosity; q2 grade pkg 100s

Special Features:

Fisherbrand grade q2 fine porosity filtration speed: 1950 seconds; flowrate: 5ml/min; smooth, dense texture surface; excellent retention. Suitable for finest precipitates such as metastannic acid, barium sulfate, mercuric chromate, strontium sulfate. Used primarily for gravimetric and inorganic analyses, collecting precipitates that tend toward colloidal dispersions; limited wet strength; manufactured from high quality alpha cotton cellulose and double washed in hydrochloric acid to reduce silicon dioxide, calcium oxide and ferric oxide levels; then neutralized in an ultrapure water rinse; leave no more than 0.01% ash when burned; meet astm requirements for ash content per circle; packed 100 circles to box and shrink wrapped for purity and cleanliness 11cm dia
